Introduction

The Career Assessment report provides you with possible career options that you can explore based on their summary code (3 letters) generated above based on your test results. The site also provides suggestions and resources to help you with your career planning process. Every code is different and may vary in the number of career options provided below.

Overview of Holland's RIASEC types

The theory is based on extensive research about how people choose careers which was first developed by Dr. John Holland in 1971. It is the most widely used interest inventory in the world. It is based upon a theory that people can be loosely classified into six different personality types; Realistic, Investigative, Artistic, Social, Enterprising, Conventional (RIASEC). The theory suggests people prefer jobs/careers where they can be around others who are like them. They search for environments that will let them use their skills and abilities, and express their attitudes and values, while taking on enjoyable problems and roles

Which type are you?

RIASEC letters can be used to describe the personality type a person's interest most resemble. For example, if their highest code is R a person can be said he is a Realistic or R type. Take note that a person often resembles several personality types not just one. A hexagon is used to show similarities and differences among the 6 types. Types that are next to each other on the hexagon are the most similar. For example, Realistic and Investigative types tend to have similar interest, whereas Realistic and Social types tend to have very different interest. Below are the characteristic and important information about the six types. Think about how it relates to you as you read the six types.

The Personality Types

I A S E C R

REALISTIC

Realistic people tend to have athletic interests, prefer to work with objects, machines, tools, plants or animals, and like to be outdoors.

Careers That Matches Your Personality Type

Below are the jobs for your 3 highest summary codes. The first letter of your code represents the careers most suitable for your personality type. The second letter represents the next careers most suitable for your personality type and so on. The types not included in the three summary codes are careers least suitable for your personality type.

You can print (a PDF report has also been sent to your email provided) and go through the careers listed below and tick / highlight careers that you have interest in and mark a question mark for those that you are interested in but need to research for more information.

Explore if the careers match your own dream careers. Narrow down your career choices and research them in detail. If the careers suggested does not match your interest, don't quickly change your plans. Instead, do some investigation to make sure you understand the career you have chosen and those suggested in this report. No single test or resource can provide you with "one" right choice. Only you can make your career decision. All the best in your future!

|--|---|---------------------------------------|
| • Aerospace Engineering and Operations Technicians | • Agricultural Inspectors / Technicians | • Aircraft and Spacecraft Technicians |
|--|---|---------------------------------------|

Next Steps

Identify and highlight those careers that may interest you (about 10-15 careers). You may not be familiar with some of the careers, don't worry, circle it and research about it later. You can do your research by reading books, searching online, reaching out to your network and finding out from those who are working in the industry, familiarizing yourself with the career of your choice, volunteering or getting a temp job in the field you are interested in, attending career fairs and seminars or interviewing industry professionals. Find out as much as you can about those careers that interests you and eliminate those that does not match your requirements.

How do I get more information?

Step 1 : Select about ten careers that you are interested in from your career test report.

Step 2 : Go to <https://www.onetonline.org/>

Step 3: Search for information about the ten careers you have short-listed and read about all ten careers.

Step 4: After reading about the ten careers, you may drop a few of them. Your list may get shorter.

Step 5: Search for universities that offer courses in the fields that you have selected. Explore the entry requirements, tuition fees, duration of the course, etc.

Step 6: Apply to the universities when applications are invited. Once the university issues an offer letter, start to make the necessary preparations.

If you are in doubt or need further career guidance, write to : [enquiry @ark.com.my](mailto:enquiry@ark.com.my). Our Career Coach will provide you all the necessary assistance you need. This service is provided FREE to all those who take our online career test.
